**Sharp Quake Jars
Descanso Area**

An earthquake at 5:41 a.m. yesterday tilted pictures hanging on walls in the Descanso area and registered an intensity of 3 on a scale of 12, according to Fred Robinson, a Point Loma seismologist.

Robinson said the quake was felt in San Diego and "could be felt quite strongly in Descanso." He said he believed the tremor was centered in the Cajon Valley area. No damage was reported.
